- End User Helpdesk
- Virtual CIO

Simply put, Ex-Cel Solutions managed services helps improve your company's bottom line by reducing IT costs and improving network performance. Managed network services is a pay one fee per month program custom designed to meet your management needs.

Ex-Cel has leveraged over 30 years of network service experience and developed best practices that we use to help manage your network. By contracting with Ex-Cel to perform managed services you gain access to a highly skilled team of engineers equipped with leading edge enterprise class, network management tools pro-actively working to improve performance and minimize downtime.

Of course, soft dollar savings through improved performance are great, but business is about the bottom line. By using improved practices and tools, Ex-Cel is able to offer services at a cost that's lower than that of the typical internal staff, dramatically reducing IT expenses.

"...aligning ourselves with you; maintaining the same interest of keeping your network running."
